VFX

Thanks for using my VFX

Here is the document about how to use this VFX package

Things that you need to use this VFX package:

- **Unity URP version: 2021.3.20f1 or higher.**
- **Universal RP: version 12.1.10 Feb 22 2023.**
- **Visual Effect Graph: version 12.1.10 Feb 22 2023.**
- **Shader Graph: version 12.1.10 Feb 22 2023.**

Universal RP Release

Unity Technologies

Version 12.1.10 - February 22, 2023

Registry Unity

com.unity.render-pipelines.universal

[View documentation](#) • [View changelog](#) • [View licenses](#)

The Universal Render Pipeline (URP) is a prebuilt Scriptable Render Pipeline, made by Unity. URP provides artist-friendly workflows that let you quickly and easily create optimized graphics across a range of platforms, from mobile to high-end consoles and PCs.

Visual Effect Graph Release

Unity Technologies

Version 12.1.10 - February 22, 2023

Registry Unity

com.unity.visualeffectgraph

[View documentation](#) • [View changelog](#) • [View licenses](#)

The Visual Effect Graph is a node based visual effect editor. It allows you to author next generation visual effects that Unity simulates directly on the GPU. The Visual Effect Graph is production-ready for the High Definition Render Pipeline and runs on all platforms supported by it. Full support for the Universal Render Pipeline and compatible mobile devices is still in development.

Shader Graph Release

Unity Technologies

Version 12.1.10 - February 22, 2023

Registry Unity

com.unity.shadergraph

[View documentation](#) • [View changelog](#) • [View licenses](#)

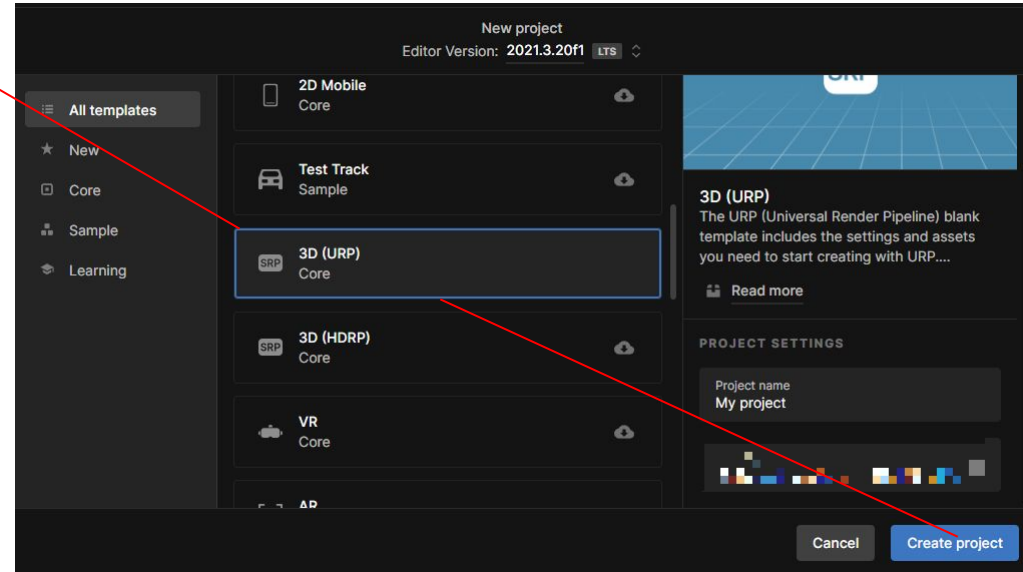

The Shader Graph package adds a visual Shader editing tool to Unity. You can use this tool to create Shaders in a visual way instead of writing code. Specific render pipelines can implement specific graph features. Currently, both the High Definition Rendering Pipeline and the Universal Rendering Pipeline support Shader Graph.

► **Samples**

Install:

Step 1: Install Unity Universal Render Pipeline 2021.3.20f1

- Open Unity Hub
- Create a Project with URP template and the version is 2021.3.20f1
- Or if you have a project already, and you want to upgrade to URP, please follow this [guide](#)

Install:

Step 2: Install Visual Effect Graph

- The Visual Effect Graph is automatically installed when you create a HDRP project. But if not, you can find it here: Package Manager, Unity Registry, High Definition RP

Visual Effect Graph Release

Unity Technologies

Version 12.1.10 - February 22, 2023

Registry Unity

`com.unity.visualeffectgraph`

[View documentation](#) • [View changelog](#) • [View licenses](#)

The Visual Effect Graph is a node based visual effect editor. It allows you to author next generation visual effects that Unity simulates directly on the GPU. The Visual Effect Graph is production-ready for the High Definition Render Pipeline and runs on all platforms supported by it. Full support for the Universal Render Pipeline and compatible mobile devices is still in development.

Install:

Step 3:Check the Shader Graph

- The Shader Graph is automatically install when you create a HDRP project. But if not, you can find it here: Package Manager, Unity Registry, Shader Graph.

Shader Graph

Release

Unity Technologies

Version 12.1.10 - February 22, 2023

Registry Unity

com.unity.shadergraph

[View documentation](#) • [View changelog](#) • [View licenses](#)

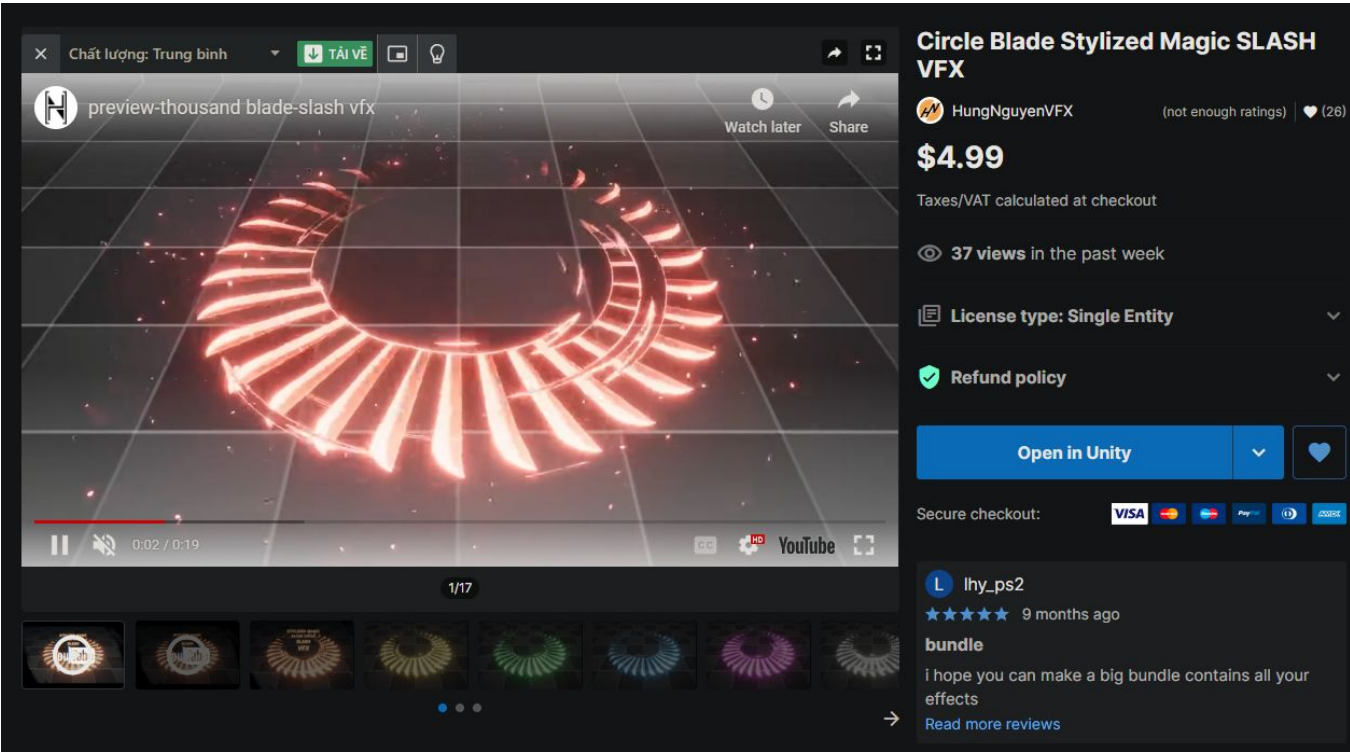

The Shader Graph package adds a visual Shader editing tool to Unity. You can use this tool to create Shaders in a visual way instead of writing code. Specific render pipelines can implement specific graph features. Currently, both the High Definition Rendering Pipeline and the Universal Rendering Pipeline support Shader Graph.

► Samples

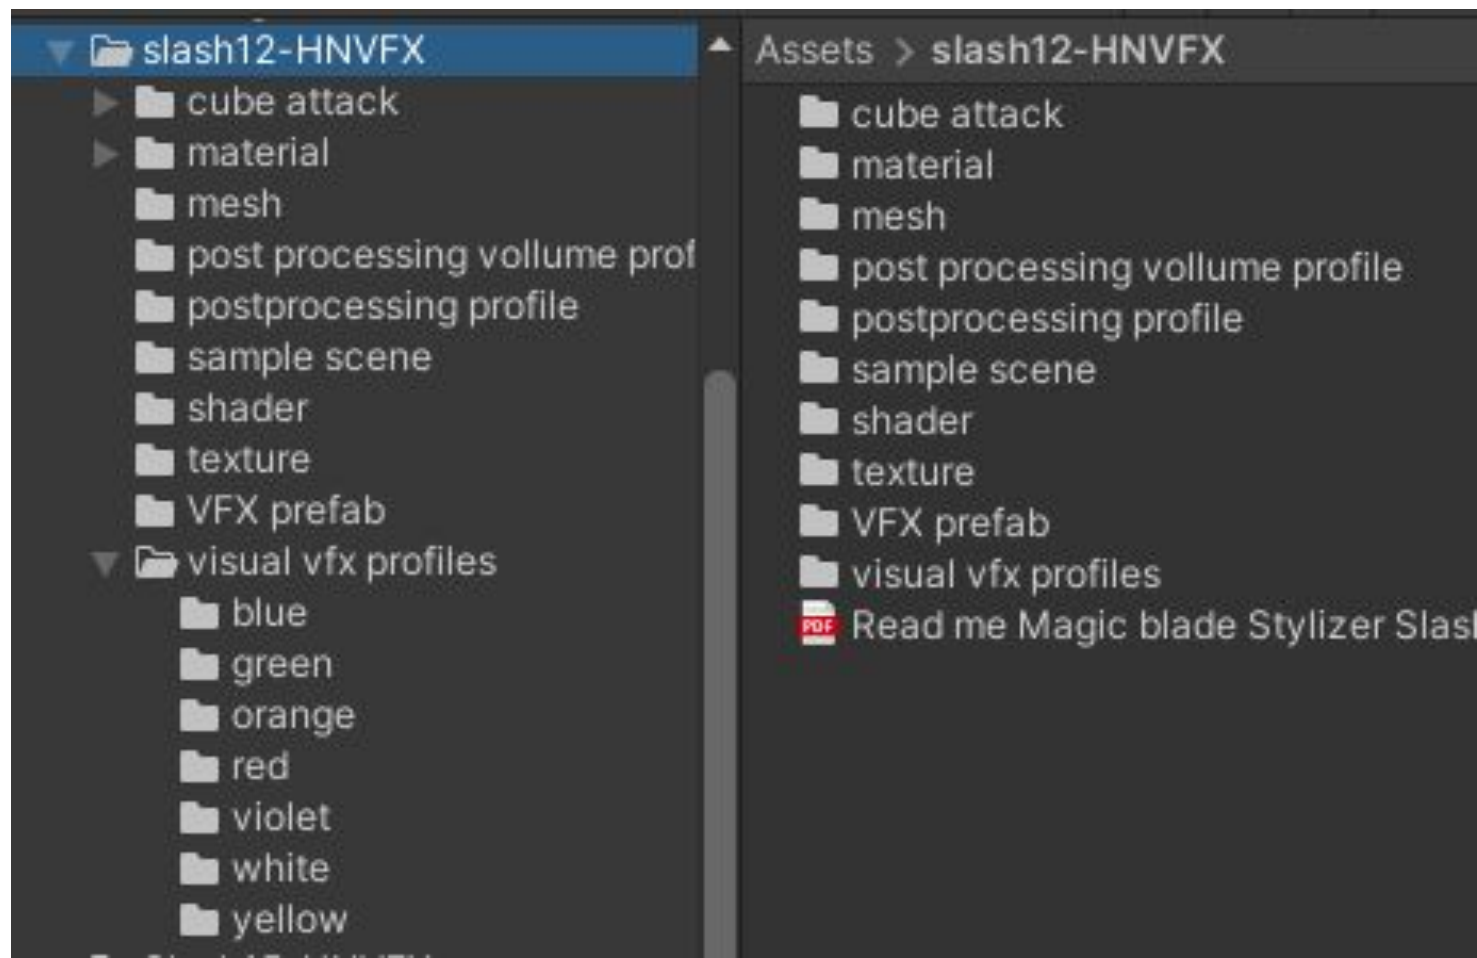

Install:

Step 5: Install the VFX package

- Go to the Assets Store site and Import the VFX package by click “Open in Unity”).

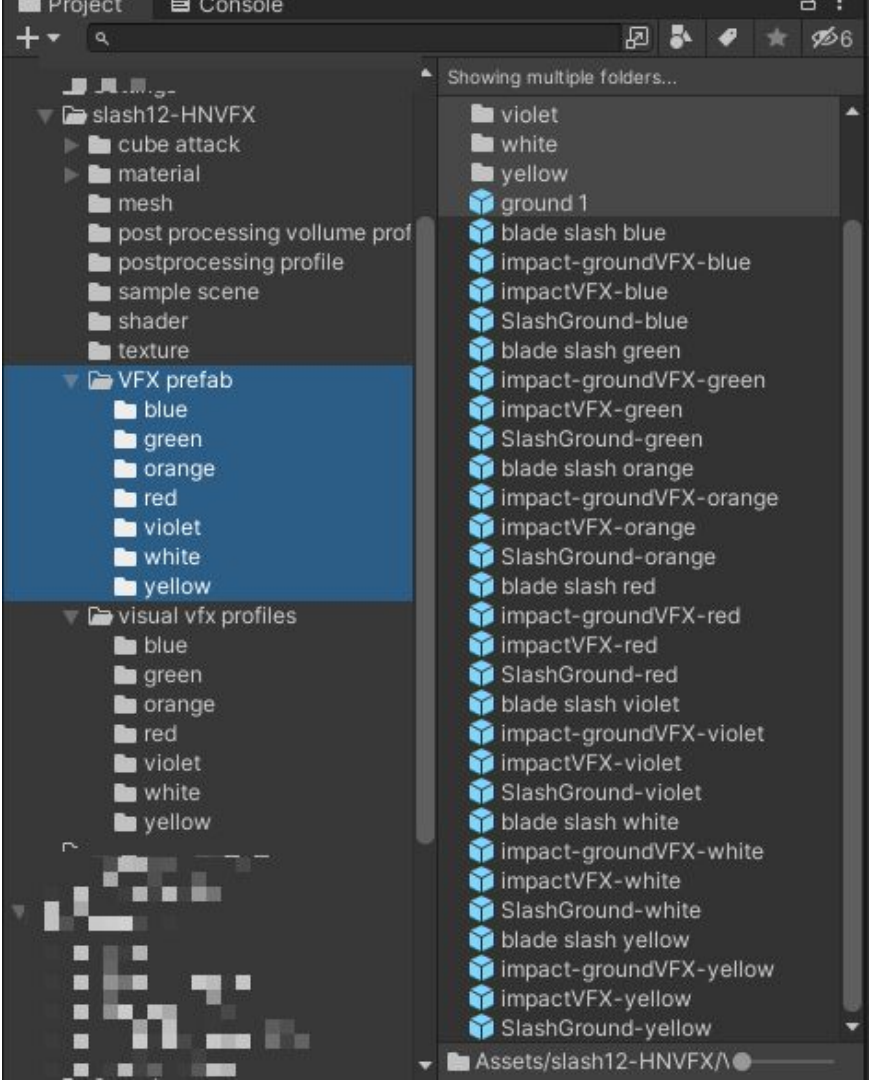

Check the VFX folder

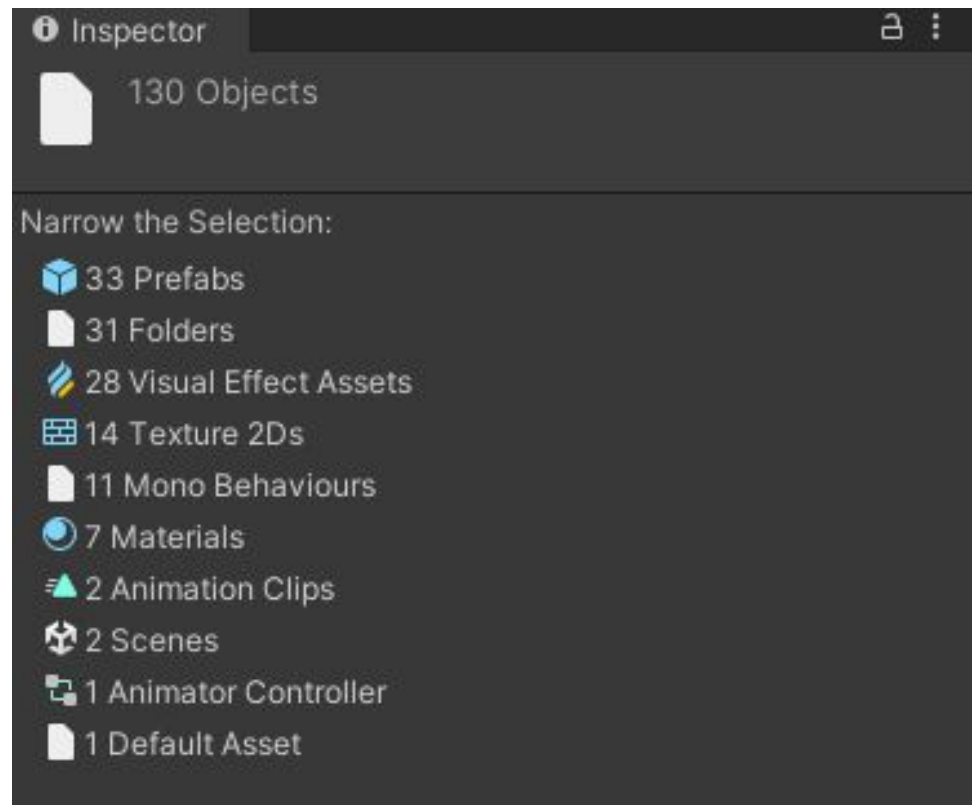

Check the VFX folder

Here you can find the vfx prefabs

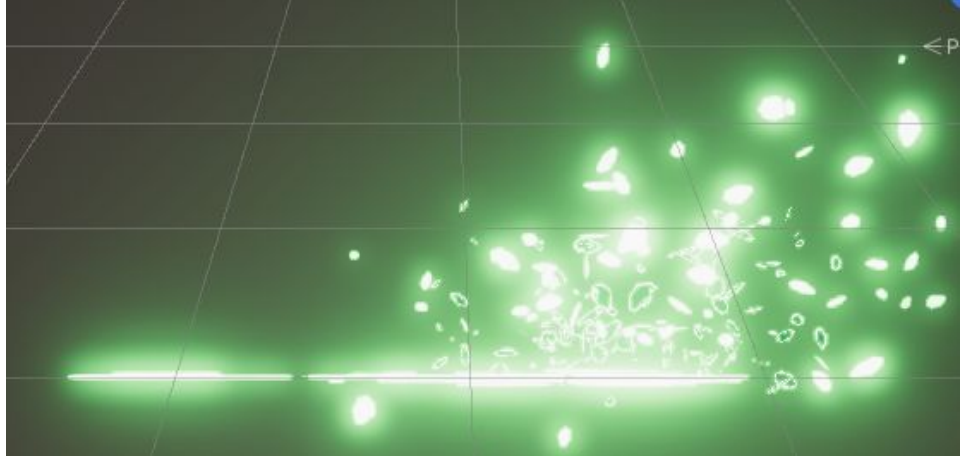

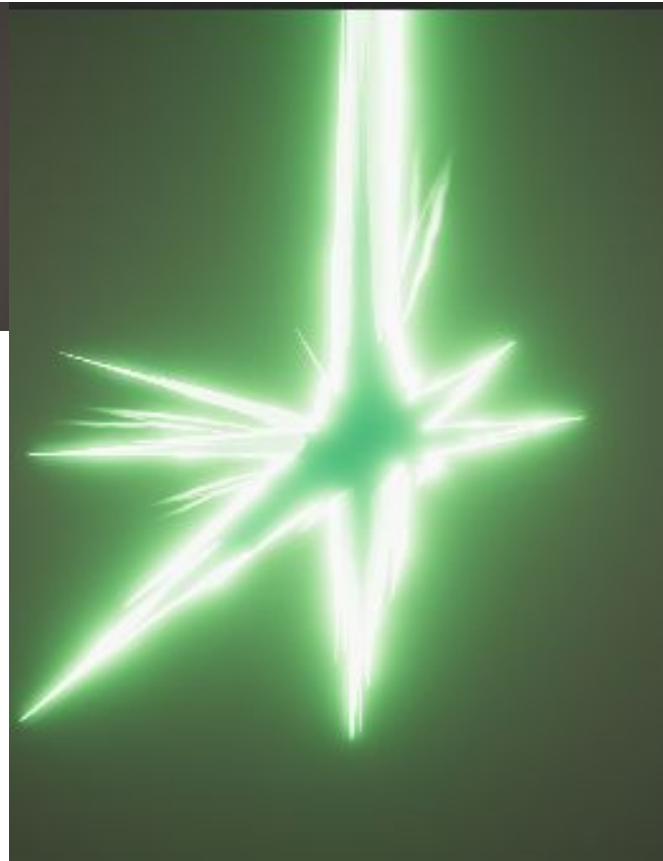

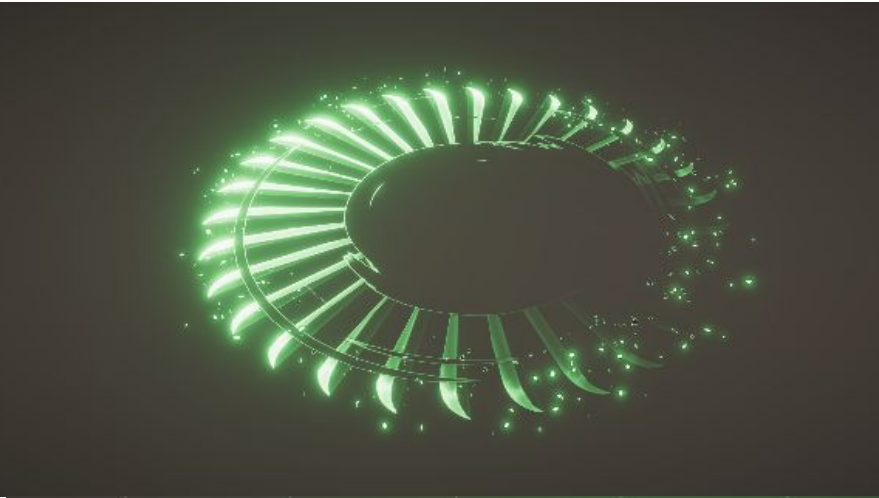

The package has 130 files include:

- 33 Effects prefabs.
- 28 VFX graph assets.
- 11 Shaders and sub shaders.
- 14 assets 2D.
- 2 sample scene.
- 3 Mesh 3Ds.
- 1 Post processing volume assets.
- 1 readme document PDF.
- 7 materials

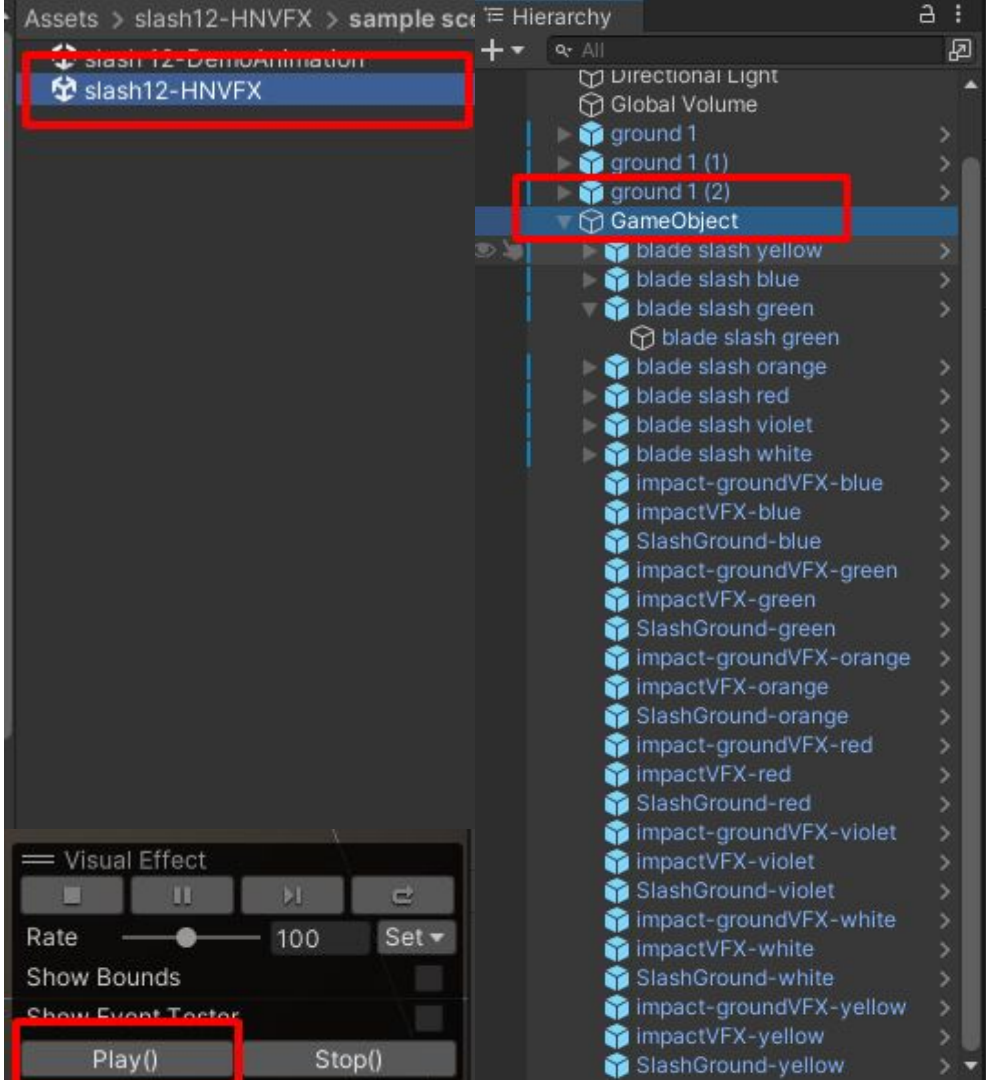

Each VFX group has 4 Parts: Slash, Impact (small), Impact (big), ground VFX

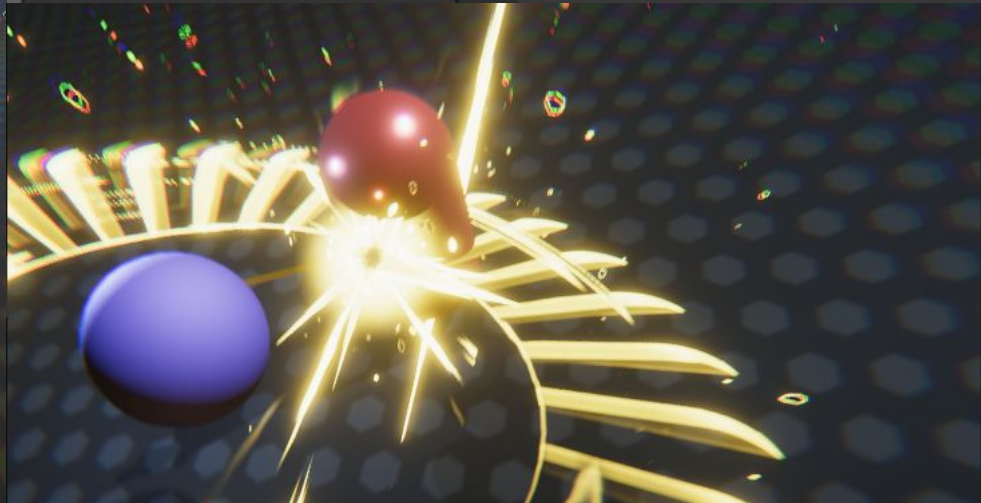

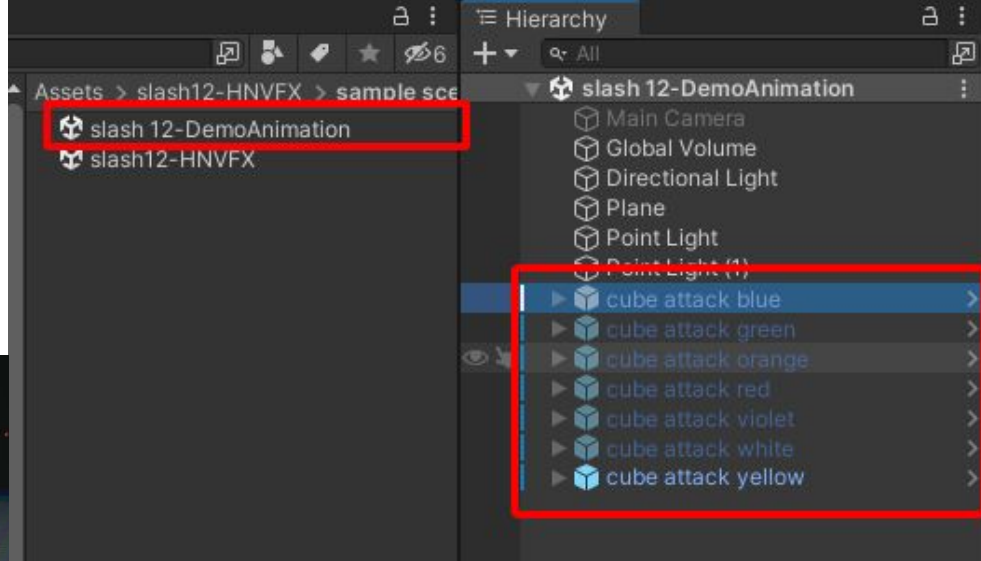

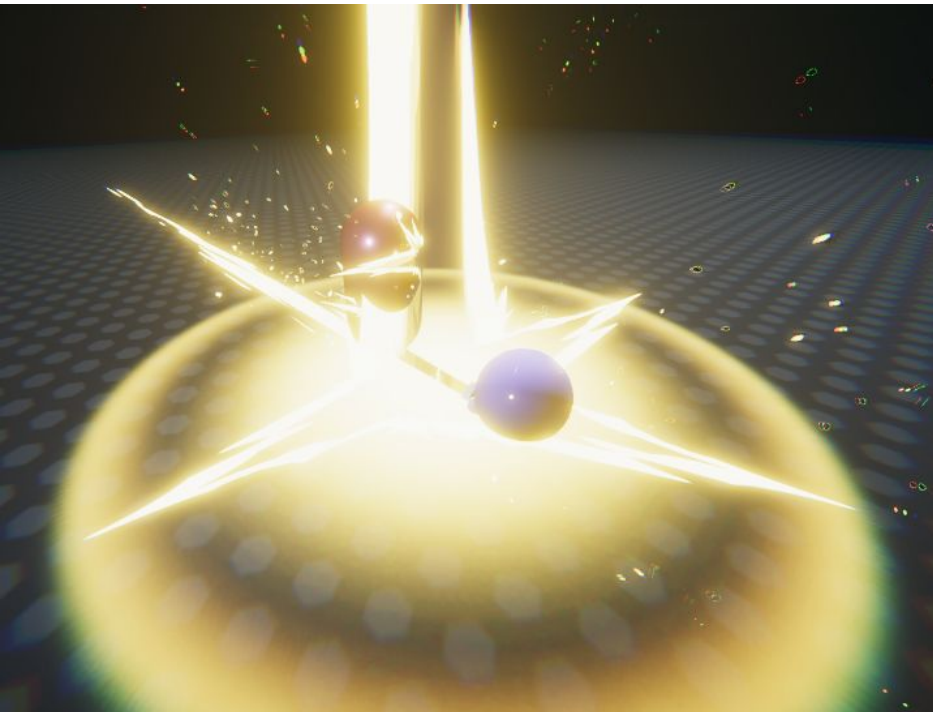

You can find there VFX in this test scene

1. Go to this Sample Scene folder
2. Open the Scene name: Slash 12 HNVFX
3. Find this GameObject.
4. Choose a VFX and play one by one to see how it works

You can find there VFX in this test scene too

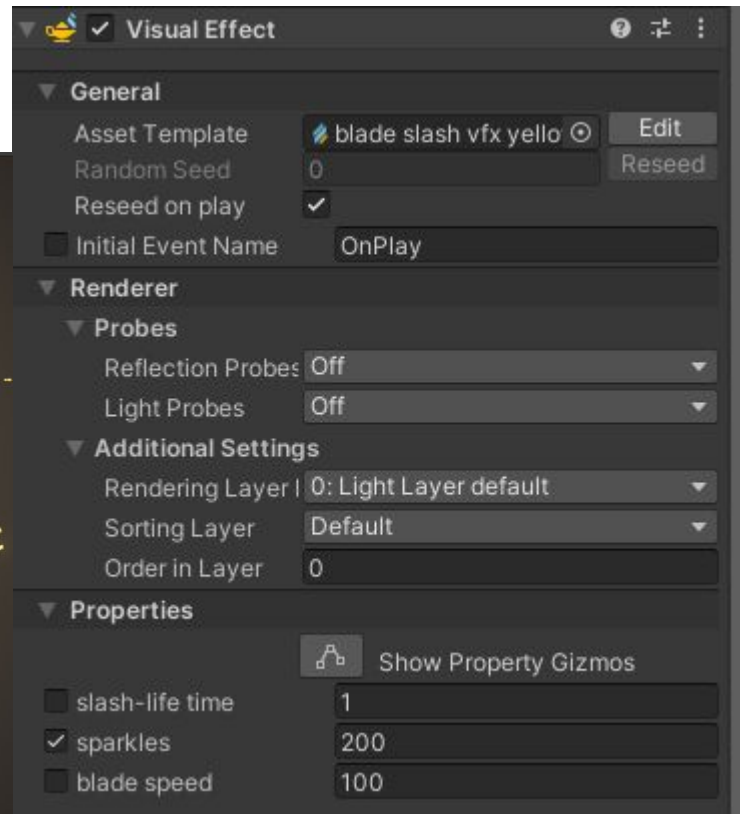

1. Go to this Sample Scene folder
2. Open the Scene name: slash 12-DemoAnimation
3. Find there GameObjects.
4. Open the animation windows.
5. Choose a prefab, active one by one and play by the animation window.

Each VFX has parameters to customize :

The Slash VFX:

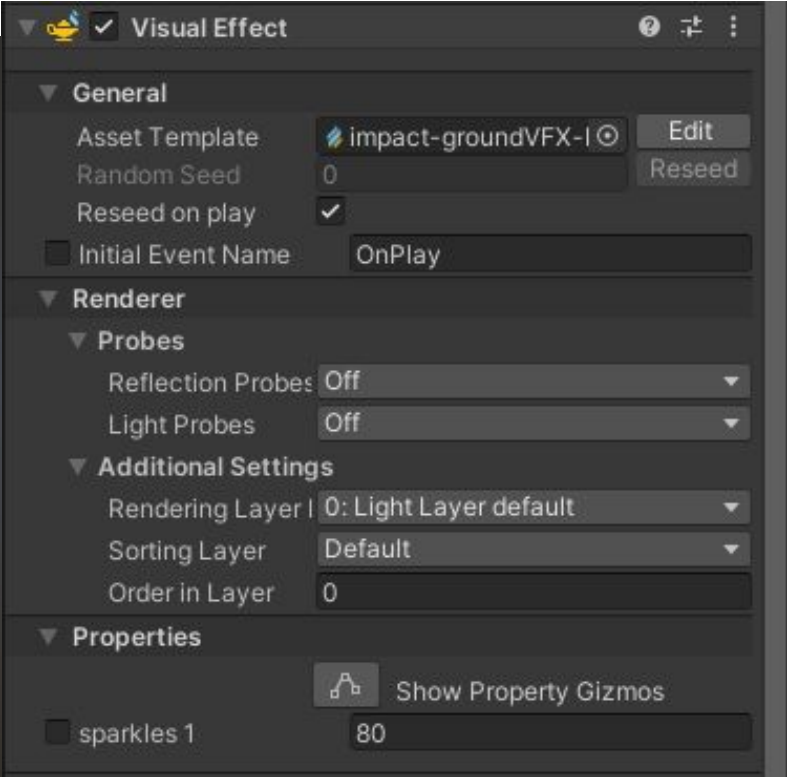

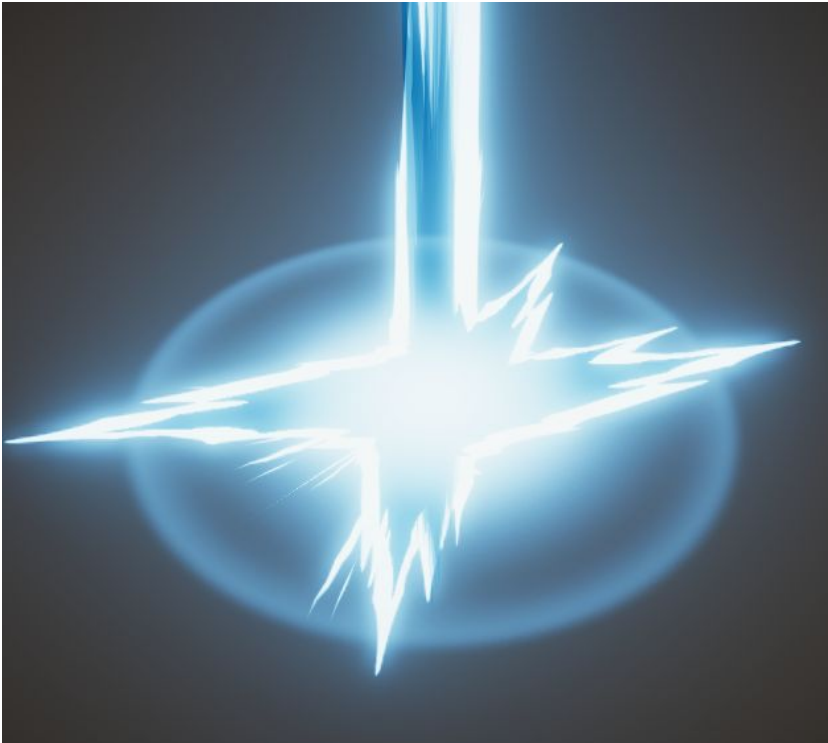

- Slash life time: time of existence of the VFX
- Sparkles: Amount of the sparkles.
- Blade speed: the speed off the blade texture.

Each VFX has parameters to customize :

The Ground Impact VFX:

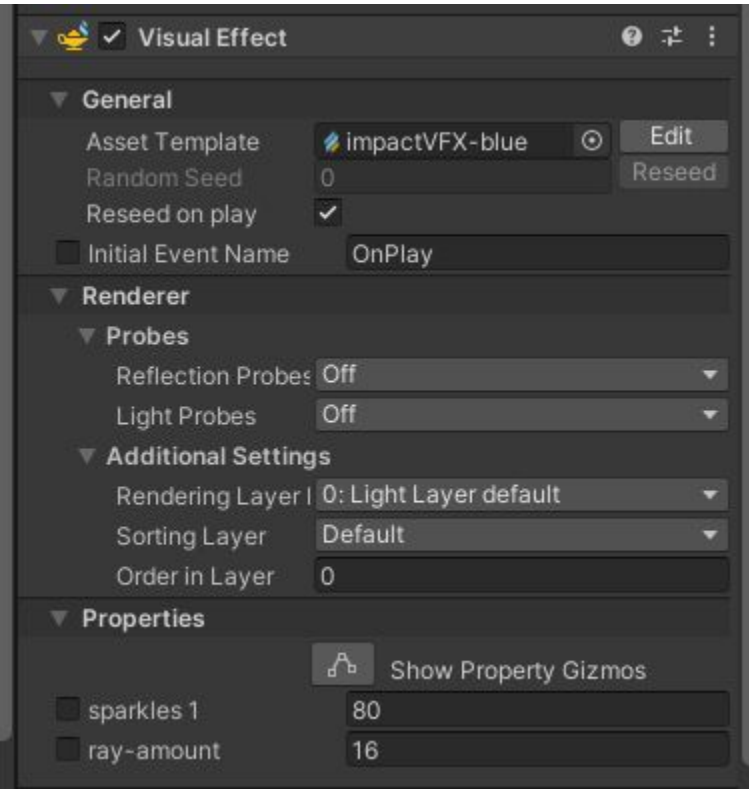

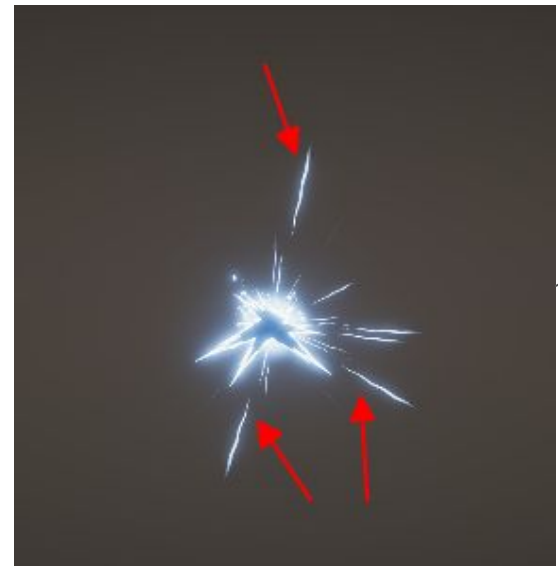

- Sparkles: Amount of the sparkles.

Each VFX has parameters to customize :

The Impact VFX:

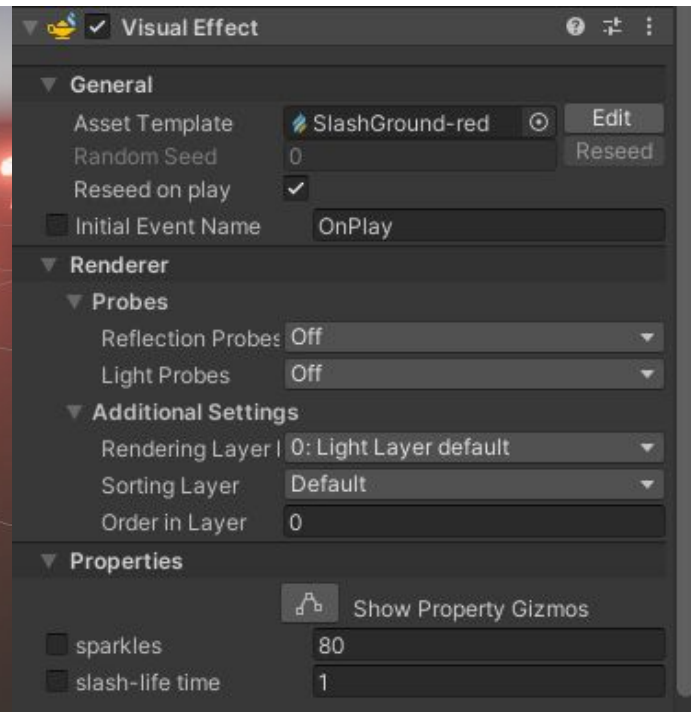

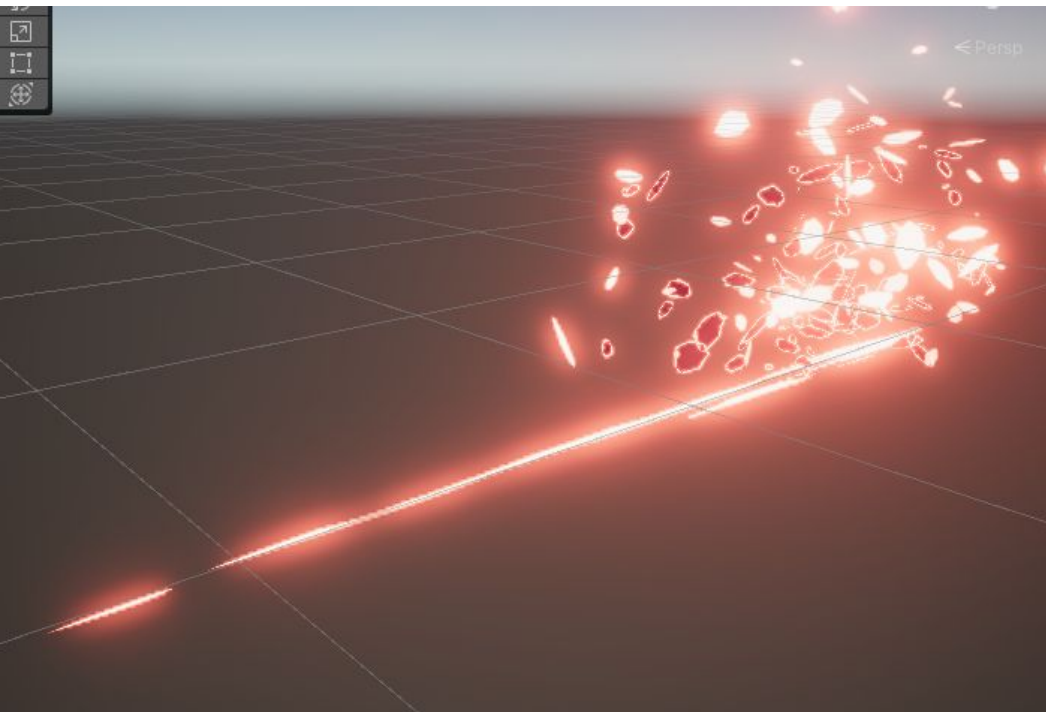

- Ray-amount: the number of ray we want.
- Sparkles: Amount of the sparkles.

Each VFX has parameters to customize :

The Slash Ground VFX:

- Slash life time: time of existence of the VFX
- Sparkles: Amount of the sparkles.

- All VFX prefabs is setted.
- Remember to follow my Guide above to install the necessary packages to run there VFX. If not, they won't run for sure.
- You can play around with there VFX as your wish

Recommend:

- Use stable version of Unity to test and import the VFX packages. (**2021.3.20f1 LTS**)
- Choose the right template of Render Pipeline for the Unity Project: **Universal Render Pipeline**.
- Prepare all necessary package first before import the VFX packages: (**Visual Effect Graph, Shader Graph**).
- Import the VFX package ***when the project was fully installed***.

THANKS, FOR USING MY VFX!

And remember: Follow the guide

- If you have any issue, please contact me via email: arthungnguyen1602@gmail.com or animatorlee1992@gmail.com.
- I'm always here for support!
- If you happy with this package, please give me a nice comment and 5 stars. That would help me a lot.
